

Manideep Aaki, software engineer

+91 7893717100 | aaki.manideep2@gmail.com | Hyderabad

Software Engineer with 5+ years of experience building React + Node.js applications, improving performance by 30% and supporting 500k+ users. Proven expertise in designing and developing dynamic, scalable web applications with interactive user interfaces using modern JavaScript frameworks such as React.js and AngularJS. Demonstrates strong problem-solving and analytical abilities, with a consistent focus on delivering high-quality, maintainable code. A collaborative team player with excellent communication skills and a strong track record of meeting project deadlines. Possesses sound technical judgment and confident decision-making skills to deliver effective solutions that drive high levels of customer satisfaction.

TECHNICAL SKILLS

Front end & Backend Technologies: JavaScript, React.js, Angular.js, Node.js, jQuery, GraphQL

Version Controls & Tools: GitHub, Bitbucket, GitLab's, Microsoft Visual Studios, Sublime Text

API Development & Testing, Project Management: Postman, Bruno, JIRA, Azure DevOps

Operating Systems & Data Formats: Windows 7/10, MacOS, iOS, JSON, XML

PROFESSIONAL SUMMARY

- Proven experience in platform modernization, including migration of legacy FreeMarker-based implementations to React.js with GraphQL within the Khoros Aurora platform, improving scalability, performance, and user experience.
- Demonstrated ability to develop one-time scripts to support data mapping and enable new feature adoption.
- Strong expertise in modern JavaScript technologies including React.js, AngularJS, Node.js, and GraphQL.
- Committed to delivering high-quality, scalable solutions that enhance global accessibility, knowledge sharing, and customer satisfaction.
- Integrated **multilingual translation workflows** using **Microsoft Translator and Smartling**, enabling automated content localization across platforms.
- Skilled in managing the full software development lifecycle, including requirement analysis, development, unit testing, production support, and release management.
- Hands-on experience working on large-scale platforms such as Microsoft Community and SmartConX, delivering user-centric features with high performance and reliability.
- Adept at analyzing production issues, providing timely resolutions, and implementing enhancements based on application usage and business needs.

WORK EXPERIENCE

SOFTWARE ENGINEER | ITD TECH | MICROSOFT | FEB 2021 - PRESENT

Domain: Communities

Client: Microsoft, USA

Environment: JavaScript, AngularJS, React.js, Node.js, GraphQL, FreeMarker, jQuery, JSON, XML, Git, Azure DevOps.

- Contributed to the development and enhancement of the Microsoft Community platform, a large-scale, community-driven support and knowledge-sharing ecosystem for Microsoft products and services.
- Designed and developed custom features to support discussion forums, knowledge bases, user groups, events, announcements, and community engagement capabilities.
- Actively involved in platform modernization by migrating legacy FreeMarker code to React.js with GraphQL queries within the Khoros Aurora platform, improving performance, scalability, and user experience.
- Supported multilingual and regional capabilities, ensuring accessibility and inclusivity for users across different geographies and languages.
- Participated in end-to-end development activities including requirement gathering, development, unit testing, deployment support, and post-release maintenance.
- Developed one-time scripts to map existing data fields and enable support for newly introduced features.
- Monitored application usage and identified enhancement opportunities to improve functionality and user engagement.
- Collaborated in Agile ceremonies including daily stand-up meetings and provided regular project status updates.

Project: Language Connector / SmartConX | Jan 2021 - Present

Client: Khoros, SAS JMP, Xactly, Palo Alto Networks (PANW), Microsoft Tech Community, Google Education, ESRI, NXP

- Played a key role in integrating the Language Connector within the SmartConX platform to enable seamless multilingual content management for enterprise clients.
- Integrated multiple translation engines, including **Microsoft Translator**, **Google Translate**, and **Smartling**, on the server side to automate translation of user-generated content (UGC).
- Enabled end-to-end content translation workflows, ensuring localized content was automatically processed and published to respective client environments.
- Contributed to the migration of legacy FreeMarker components to React.js with GraphQL, improving system performance, scalability, and maintainability.
- Supported the full development lifecycle, including requirement analysis, development, testing, production support, and release activities.
- Provided production support and resolved client-reported issues through effective troubleshooting and timely fixes.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Malla Reddy Institution of technology, Hyderabad

Graduated: October 2020`
